

Student Assistant **– take part in a unique energy efficiency system**

Student Assistant for COACH Solutions

Due to increased activity, we are looking for a Student Assistant to join COACH Solutions. In COACH Solutions we offer our clients top of the line software solutions for improving the energy efficiency onboard their vessels. We work closely together with our partners, typically Operations and Technical Management departments globally. We are currently experiencing rapid growth in the demand for our services, and you will be part of and play a crucial role in this development.

Our main product in COACH Solutions is a software system that analyses the hull, propeller and engine efficiencies and monitors the energy production onboard the vessels.

The team consist of people with many skills ranging from hydrodynamics, mechanical engineering, software developers and seagoing experience. Our key initiative is development and operation of our system for monitoring the fuel efficiency and performance of our clients' fleet. The scope of monitoring is – like our projects – broad and requires detailed knowledge about ship technology.

We are looking for a student assistant to help us with our daily tasks. The right candidate has 2 years left of education, good knowledge within the area of ship technology and with a keen interest in data analysis, mathematical modeling and perhaps software development.

Translating business requirements into value adding solutions

As a Student Assistant within our team, you will primarily:

- Create performance models for vessels
- Help prepare and analyze monthly reports
- Help with smaller ad hoc projects
- Collect technical documentation from vessels

However, as we are working in a dynamic environment new focus areas may emerge.

The position offers you a unique opportunity to influence the operation of a large fleet and you will gain valuable experience in ship operation and performance optimization.

We offer a position in a dynamic environment with dedicated colleagues that you can learn from. We are located in Nordhavn, close to public transportation. We have a canteen service, on-site fitness center and our staff club hosts a number of sports- and social activities that you can attend.

Contact us

Please do not hesitate to contact Anders Bruun, Managing Director, on tel 53 54 49 69 or abr@coach-solutions.dk, should you have any questions in regards to the position or the recruitment process.

To apply for the position please submit your application

<https://app.elvium.com/en/positions/2968/c/applications/new> (We only accept applications via this link).

Deadline 30. September 2017. We process applications continuously.

ABOUT COACH Solutions

COACH Solutions is a vessel performance monitoring system that provides the ship operators with voyage observation and analysis on hull, propeller and engine efficiencies. In order to optimize energy consumption, COACH Solutions keeps the operator updated during and upon completion of the voyage. To learn more please visit our website: <http://www.coach-solutions.dk/>
